<b>Target version:</b>	
<b>Description</b>	
When working with many files in PyCAMA an error may occur:	
<pre>'Unable to open file (Unable to open file: name = 'g2a_offl_l2__omicld_20100915t055740_20100915t073904_20267_02_001102_20170214t193130_clim.nc',   errno = 24,   error message = 'too many open files',   flags = 0,   o_flags = 0)'</pre>	
Need to tighten the file open/close loop for the input files.

- Status changed from *In Progress* to *Resolved*

Now closing file references when they aren't needed anymore. This should not introduce errors as opening was already on-demand.
