Category:	Estimated time: 0.00 hour
Target version:	
Description To be able to test the MPC L2 QC we need test data. We have for most products a test MPC file, but these cover only a single day. For testing of database ingestion, selection and plotting of time lines, at least a few days are needed, and preferably even a few weeks of data. Note that the test data does not have to be 'real' data. Data may be replicated, as long as it covers different time periods and orbits.	

History

#1 - 03/22/2017 09:59 AM - Maarten Sneep

- Status changed from New to In Progress
- Assignee set to Maarten Sneep

Used the time_shift.py script to time-shift L2 data and run PyCAMA on those.

Results are internally available in /net/pc170012/nobackup/users/sneep/VT_07/PDGS_rehearsal_20170201/OFFL/time_shifted/QC for aerosol index, others to follow.

#2 - 03/22/2017 02:04 PM - Maarten Sneep

- Status changed from In Progress to Resolved
- % Done changed from 0 to 100

Now running for 25 days for 10 products.

#3 - 06/13/2017 02:00 PM - Maarten Sneep

- Status changed from Resolved to Closed
