

PyCAMA - Bug #27251

[PyCAMA] incompatibility with python 3.3

07/24/2020 08:23 AM - Maarten Sneep

Status:	Resolved	Start date:	07/24/2020

Target version:			
Description			
<p>Currently python 3.3 is used in the PDGS. In the standard library of this version the plistlib module does not have a load() function, only a readPList() function. Of course, in python 3.7, the readPList() function is marked as deprecated, so supporting both versions is a bit more challenging.</p> <p>This is fixed in version 0.10.2. This version will be put in the DMSF once I have received confirmation that there are no further issues for starting DDS2B.</p>
