

TM5-MP - Bug #353

years available for isoprene/terpene and boundary emissions

04/03/2015 12:37 PM - Philippe Le Sager

Status:	Closed	Start date:	04/03/2015
Priority:	Normal	Due date:	
Assignee:	Philippe Le Sager	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	1.00 hour
Description			
code must account for emission years available for isoprene/terpene and some of the boundary files: CH4-surf emissions, and MSR product for O3.			

History

#1 - 04/03/2015 01:40 PM - Philippe Le Sager

- Subject changed from years available for isoprene/terpene and ch4 emissions to years available for isoprene/terpene and boundary emissions

#2 - 08/20/2015 01:19 PM - Philippe Le Sager

- % Done changed from 0 to 70

Fixed CH4 surface zonal mean and MSR2 product for O3 boundary ([r254](#)).

#3 - 09/04/2015 07:59 AM - Philippe Le Sager

- Status changed from New to Closed

- % Done changed from 70 to 100

Fixed isoprene availability in MEGAN for cb05 branch ([r263](#)). Monoterpenes were already available in the yearly MEGAN archives.
