Target version:			
Description			
<p>When requesting the timeseries graph of an RGB layer the following error is displayed:</p> <p>Sorry! An error occurred while receiving JSON data from the server: [SyntaxError: Unexpected token <]</p> <p>Either the syntaxerror can be fixed, or no timeseries graph is displayed on RGB layers since it's nonsensical.</p> <p>PS This could be a server side bug and therefore not belong here?</p>
